

Joomla – Add an Image to an Article

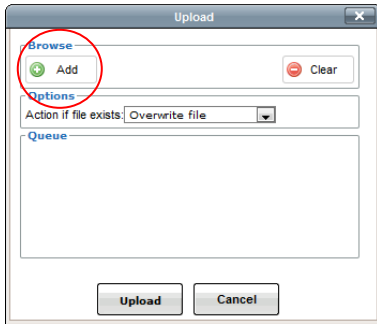

These instructions are for Joomla 1.5 with JCE Editor including the Advanced Link plug-in installed

Inside your Article, Click your mouse in the position where you want your image to be, then click on the Image Icon

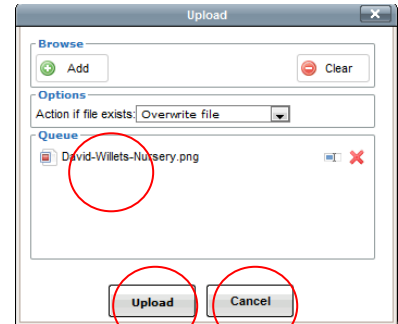

Click on the folder where you want to store your image, then on the Upload Icon

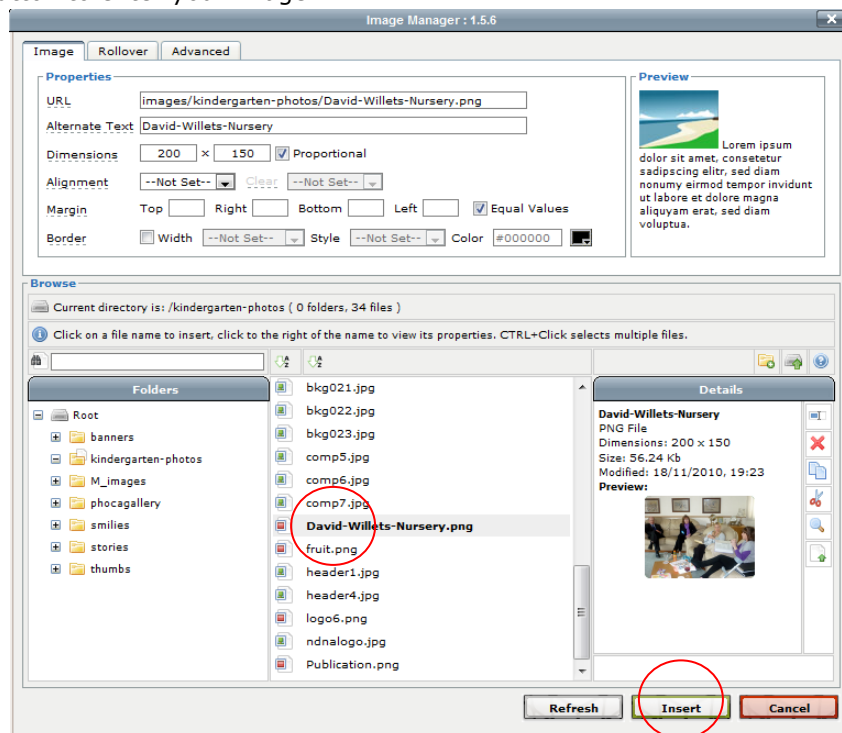

Click **Add** in the upload window

You will be taken to a browse window where you can browse your computer for the location of the file you want to upload, when you have found your file, double click on it and it will become listed in the Queue area of the upload window

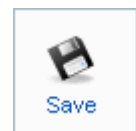

Click the Upload button to upload this file, then the Cancel button to close the window

Your image has now been uploaded to the Internet, Click on the image name and the Properties area at the top of the Image Manager will automatically be completed and ready to enter into your webpage. Click the Insert button to enter your image

Your image is now added to your article

Remember to Save your article **often** using the save button at the top of the page and always **Save before exiting**
