

Tutorial: Joomla 1.5 – Create an Article

The content on your website is created in Articles; if your website has more than just a few pages the Articles which feed these pages will be sorted in Sections and Categories, Articles which are not placed in Sections/Categories are stored 'Uncategorised'.

Login to the Administration section of your website

Select **Article Manager**

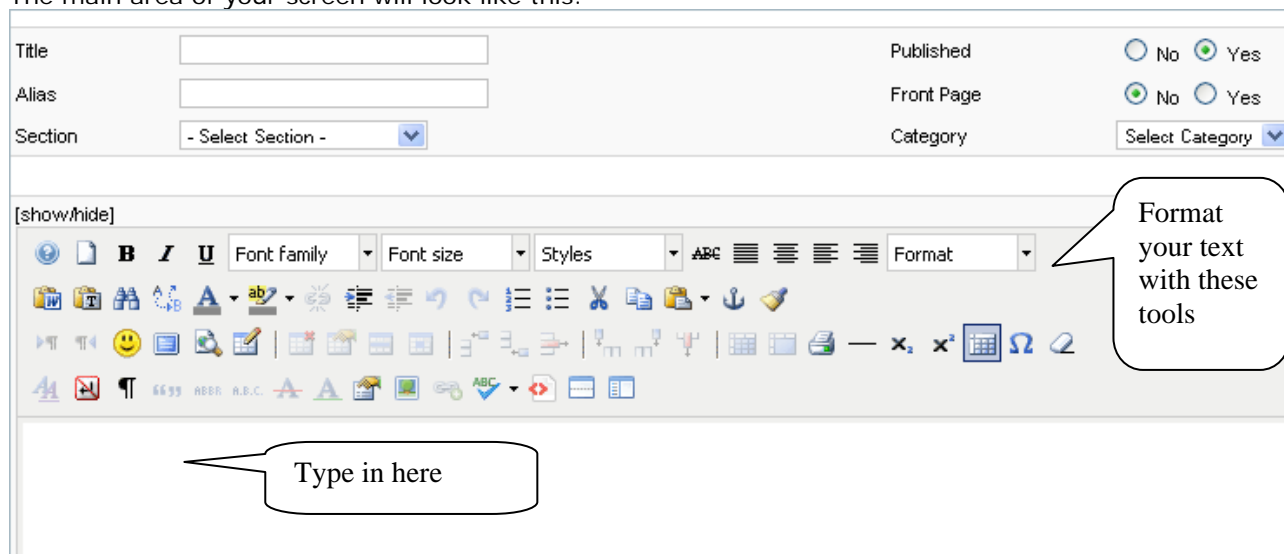

You will see a list of all the Articles in your Website

Click on New (top right of your page)

The main area of your screen will look like this.

A screenshot of the Joomla 1.5 article creation form. The form is divided into several sections. At the top, there are input fields for "Title" and "Alias", and a dropdown menu for "Section". To the right, there are radio buttons for "Published" (No/Yes) and "Front Page" (No/Yes), and a dropdown menu for "Category". Below these fields is a large text area for the article content, with a toolbar above it containing various formatting options like bold, italic, underline, font family, font size, styles, and alignment. A speech bubble points to the toolbar with the text "Format your text with these tools". Another speech bubble points to the text area with the text "Type in here".

Please note: This example has more tools than the standard Joomla 1.5 setup as I have installed the JCE editor.

Enter your information in the corresponding fields

- Title:** The name of your Article
- Alias:** Leave blank
- Section:** Select Section OR Uncategorised
- Published:** Select 'Yes' if you want your Article to be seen
- Front Page:** Select 'Yes' if you want your Article to appear on the front page of your website
- Category:** Select Category OR Uncategorised
- Main Body:** Type your Article content in here using the tools to format your text

Remember to Save often using the save button at the top of the page and always **Save before exiting**
